6. Write the list of contents for a manual of any household electronic gadget. 5
7. Make a précis for the following passage and give a suitable title : 10

Although age-old questions inherited from eras forgotten in the depths of the past still haunt us, even more puzzling than these old ghosts are the new clusters of problems that are continually emerging and intertwining with the old ones in our time. If the world situations were baffling a couple of decades ago, they are now totally disconcerting and laden with ever-new challenges. In spite of the enormous amount of knowledge and technical means at our disposal, we are beset by a feeling of inadequacy that erodes the confidence that we recently acquired in our power and resourcefulness and that creates a sense

- of insuperable crisis. In order to assess both how serious our present condition really is and what our future prospects really are, we must first understand the causes of our predicament. Only then can we hope to find ways of removing those causes and eventually putting human life on a governable course. The interwoven factors which make the contemporary world unstable are numerous. Basic among those, ironically, is the very position of supremacy over all life forms that our species has attained on a planetary scale. (190 words)
8. Write an essay on one of the following : 20
- (i) Global warming.
- (ii) Ill effects of ragging.
- (iii) Electronic revolution has killed the pleasure of reading.
