# INTERNSHIPS

The BMS, BBA (FIA), B.Sc. (H) Computer Science curriculum constitutes a component of industry exposure for students, which mandates penultimate year students to pursue a summer training/internship. Subsequently, students prepare internship reports that highlight research methodologies and tools used in their projects during the internship tenure. Over the years, students have undertaken internships in various domains like Consulting, Finance, Analytics, Marketing, Software Development, Research and Business Development at firms like FTI Consulting, Deloitte, KPMG, EY, Reckitt, Silver Piston, Shannonside Capital, Grant Thornton, CBRE, Fundwave, Rescon Partners, Indian Angel Network and IHS Markit to name a few. This is a testament to the fact that SSCBS houses some of the brightest talent in the country with the students continuously developing industry-relevant skills and gaining hands-on experience to stay amongst the top.

The final year students have pursued an internship in the above mentioned organisations. This does not imply that all such processes were conducted by the Placement Cell
