## Activity Summary

### OBJECTIVE OF THE EVENT

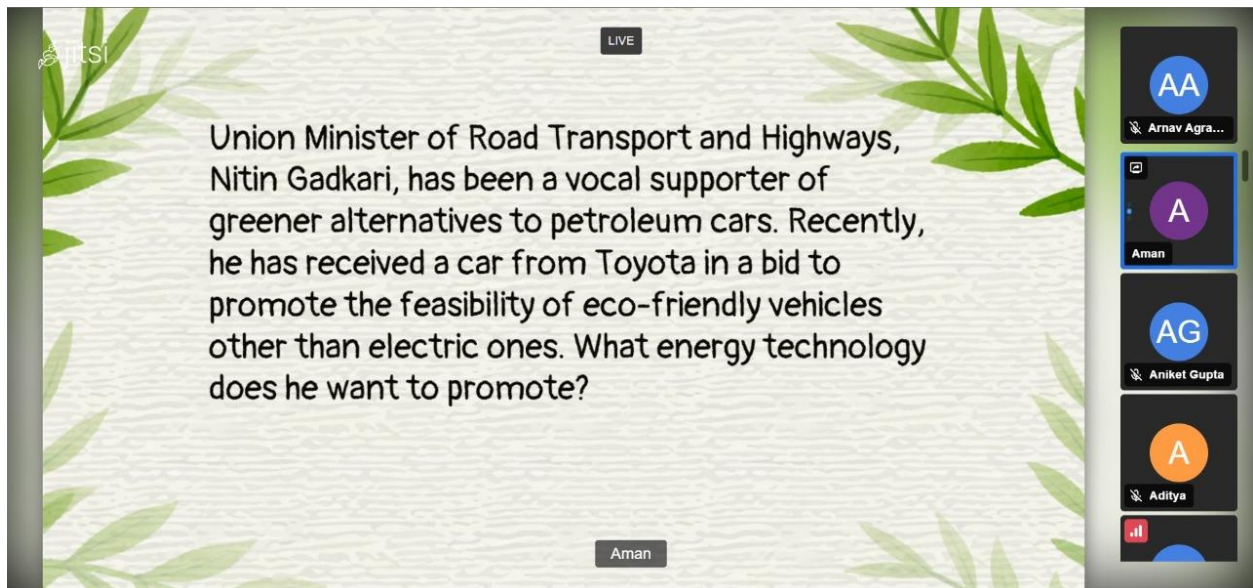

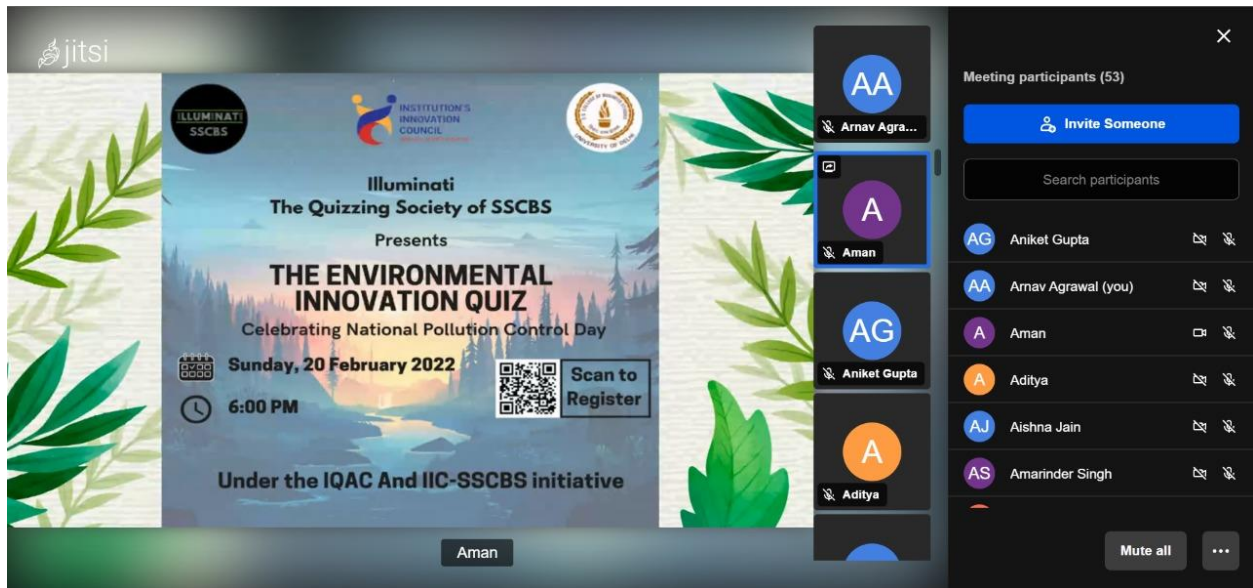

To observe National Pollution Day through an interactive quiz competition. Through the competition, we aimed to make people aware of environmental issues and some of the recent innovations in the field.

### KEY OUTCOMES OF THE EVENT

The quiz held on 20th February was successfully organized in the online mode. It contained questions about innovations that are advancing the cause of environmental preservation and restoration. It proved to be a fun, interactive and knowledge enhancing way of promoting and spreading awareness about the field of innovation. The quiz drew upon the latest developments like cryptocurrency, green hydrogen, and government initiatives in line with the topic. Keeping in mind the occasion of National Pollution Control Day, some questions provided information on interesting facts about novel methods to

control pollution in. To keep the quiz engaging and relatable, questions related to pop-culture phenomena were also asked. Participants were able to gain awareness about innovative practices being followed and developed in India and abroad. Feedback was overwhelmingly positive overall, with almost all of the respondents being open to attending similar events in the future.
