## **Objective of the Session**

Mr. Aseem gupta aim is to give an awareness & knowledgeable session to our students about the EV Sector. He explained about what is EV and it's main components i.e. it is an electric vehicles, referred to as battery. It has an electric motor instead of an Internal Combustion engine. He gave introduction of the process as well as how does it work and how we can charge an EV by plugging it into a public charging station or a home charger and also how far we can travel on full charge, Each model has a different range, battery size and efficiency. Two main types of EV are: Hybrid Electric and 100% Electric. Mr. Aseem educated our students about the EV Batteries and there types:

- Lithium Ion Batteries

- Nickel – Metal Hybrid (NiHM)
- Solid state Batteries
- Ultra capacitors

- Lead Acid Batteries
- Aluminium Ion Batteries
- Sodium Ion Batteries
