

CDF — The SSCBS chapter of Connecting Dreams Foundation

What We Do?

A community of dedicated youth with a shared objective to bring about sustainable and scalable change. We work along the lines of 17 Sustainable Development Goals (SDGs) as defined by the United Nations.

Key Achievements in 2021-22

Project Hunar:

Project Hunar's primary aim was to empower women and children through vocational training and the creation of eco-friendly products. The project successfully disbursed 100% of the generated profit to women associated with "Naya Savera." Through this endeavour, we also provided opportunities for over 80 women, enabling them to enhance their skills and contribute to sustainable livelihoods

Key Events in 2021-22:

Community

visit:

As part of Project Hunar's community engagement efforts, a significant visit was organized to empower women and children through vocational training and the creation of eco-friendly products. Over 80 women participated, benefiting from skill enhancement sessions aimed at improving their livelihoods and fostering self-reliance. Through tailored training programs, participants gained practical skills for sustainable income generation while contributing to environmental conservation. This comprehensive approach not only addresses immediate needs but also lays the groundwork for long-term community resilience. Moving forward, Project Hunar remains dedicated to advancing such initiatives, aiming to empower individuals and foster sustainable development for a brighter future.
