About ACM

ACM, the Association for Computing Machinery is the world's largest educational and scientific computing society, uniting educators, researchers and professionals to inspire dialogue, share resources and address the field's challenges. ACM strengthens the computing profession's collective voice through strong leadership, promotion of the highest standards, and recognition of technical excellence. ACM supports the professional growth of its members by providing opportunities for life-long learning, career development, and professional networking.

With nearly **110,000** members from more than 190 countries, ACM works to advance computing as a science and a profession.

Events by ACM

IdeaGem 1.0 - Tech Strategic Ideathon

IdeaGem 1.0 emerged as a beacon of innovation, drawing 431 registrations and attracting over 150 participants from across the nation. With 34 dynamic project submissions, the event showcased the diverse talent and creative spirit of our participants.

Our esteemed panel of judges are **Ayon Roy, Jaskirat Singh, Abdal Lalit, Manan Bedi, Monika Chauhan and Prashi Garg**, including industry experts and renowned professionals, added prestige to the event, providing valuable insights and guidance to our budding innovators. We are grateful for their invaluable contribution to IdeaGem 1.0.

We are proud to have **iCreate** as our sponsor, who generously provided incubation opportunities worth **50,000** to all five winning teams, making the **prize 250,000rs**. Their support has transformed IdeaGem 1.0 into a platform that not only encourages innovation but also nurtures startup aspirations.

IdeaGem 1.0, held on February 29, 2024, transcended traditional coding events, inviting participants of all coding backgrounds to collaborate and create without boundaries. With the strategic use of "CBSCoins," teams were empowered to make bold decisions, driving creativity and innovation to new heights.

Thank you to all participants, judges, sponsors, and organizers for making IdeaGem 1.0 a resounding success. Together, we have redefined possibilities and embarked on an exhilarating journey of innovation and creativity.

ACM Insider 1.0

ACM SSCBS is excited to announce the success of ACM Insider 1.0, a beginner-friendly coding competition that witnessed enthusiastic participation from college students. This inclusive event welcomed participants with varying levels of expertise, providing them with a platform to showcase their coding skills and problem-solving abilities. Although tailored for SSCBS students, both ACM members and non-members, the competition attracted students from various colleges, creating a vibrant and engaging atmosphere. ACM Insider 1.0 proved to be a rewarding experience for all involved, highlighting the talent and enthusiasm present within the coding community.

Code Mystique 1.0

Code Mystique, an online event hosted on Unstop, attracted students from various colleges. The event featured multiple rounds, including online treasure hunting, coding challenges, and competitive programming competitions. Designed to foster a robust understanding of data structures and algorithms among students of all colleges, Code Mystique provided a platform for participants to showcase their problem-solving skills and programming proficiency. Through engaging activities and challenges, the event aimed to encourage learning and growth in the fields of DSA and CP.

Polyglot Language Shifter Challenge

ACM SSCBS hosted the Polyglot Language Shifter Challenge, a dynamic coding event designed exclusively for our members. Participants showcased their coding prowess by completing two engaging tasks: identifying bugs in code snippets and translating code from one language to another. This unique challenge fostered camaraderie and competitiveness among our members while enhancing their coding skills and knowledge. By promoting learning and innovation, the event aimed to ignite a deeper interest in coding and competitive programming within our community.

Design Dash: Simulation Design-A-Thon Report Summary

ACM SSCBS organized the Design Dash: Simulation Design-A-Thon exclusively for our teams, focusing on honing their front-end development skills. Teams were assigned a theme and tasked with creating a website UI using frontend technologies such as HTML, CSS, JavaScript, React, and Tailwind. With over 10 front-end project submissions, participants demonstrated their creativity and proficiency in front-end development. The event provided an invaluable learning experience, allowing students to refine their skills and gain practical insights into UI design and development.
